

MicroLA Class Hierarchy (C++11-C++26)

Features:

- N-dimensional vectors
- Component access (x,y,z,w)
- SIMD: NEON/RISC-V for float 2/3/4
- CMSIS-DSP optimized
- constexpr compatible
- Zero allocation

Features:

- Row-major storage
- Block operations
- Determinant/inverse ($\leq 3 \times 3$)
- SIMD matrix multiply (NEON/RISC-V)
- constexpr compatible
- C++11-C++26 optimizations

Features:

- [x,y,z,w] memory layout
- Vec<T,3> integration
- SLERP interpolation
- Full NEON/RISC-V support
- 3.5x faster multiply (NEON)
- constexpr compatible
